

# PERFORMING LASERS FOR INDUSTRY

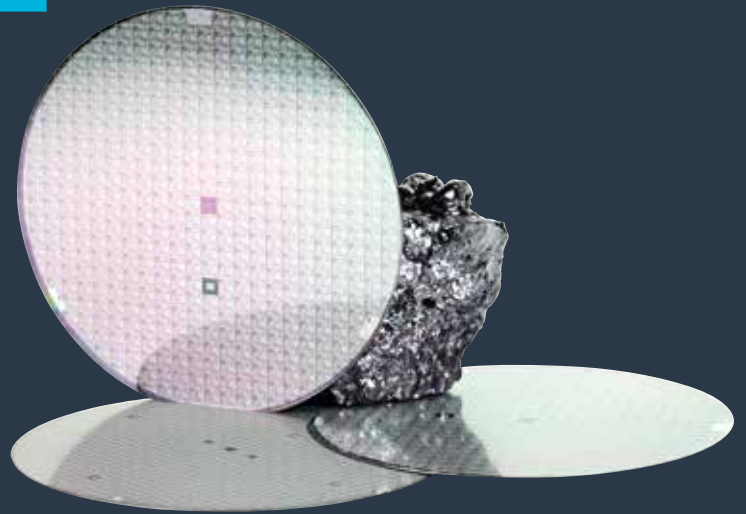

# SILICON ANNEALING

---

High quality laser  
for nanosecond processing

- High intensity pulses
- High beam quality
- Outstanding stability and reliability
- Compact and rugged design
- Several wavelengths available

ETNA

SAGA

## PRODUCT

# OLED LIFT-OFF

---

High repetition rate for effective throughput

- Fast processing speed
- High average power
- DPSS laser for minimal running costs & maintenance free operation
- Low footprint
- Fiber module available

# LASER SHOCK PEENING

---

High energy pulses for large area processing

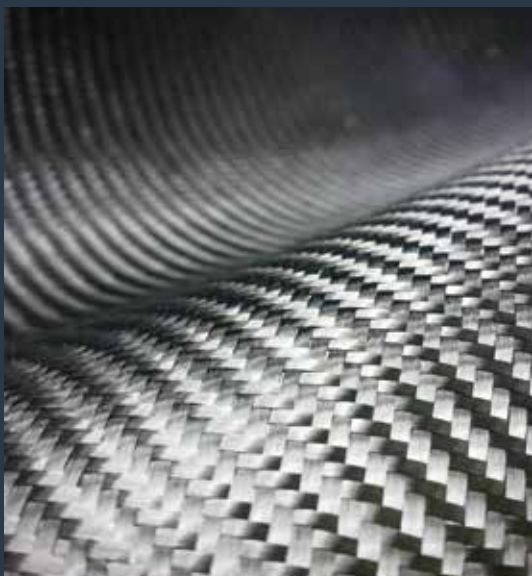

- High intensity
- Excellent beam profile
- Rugged design
- Homogenizer option for beam shaping profile
- Dual pulse option available
- Wide range of products available

## GAIA

## FAMILIES

## CFRP CUTTING

---

High precision for clean cutting

- Fast processing speed
- High average power
- High stability and beam quality
- Maintenance free operation
- Low footprint
- Fiber module available
