Thales Security Digital Platform helps industries & organization (civil & military) to guarantee their critical service continuity by protecting people & assets within sensitive sites. Capitalizing on more than 20 years (+ 400 sites) of expertise and new disruptive technologies, the Security Digital Platform drastically improves security thanks to better anticipation, detection and time to respond to incidents, while reducing operating costs.

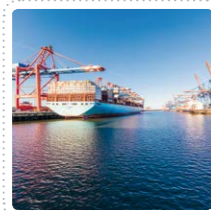

An open and cybersecured digital platform deployable on cloud or on premises

- Rapid insertion of innovation leveraging an ecosystem of partners, customers and Thales Labs
- Powered by Artificial Intelligence and Big Data analytics for automated, automated data processing and decision-making
- Maximizing user experience
- Open and flexible solutions, easily adaptable to specific needs
- Information sharing through collaboration to break silos for improved efficiency
- Cloud technology offering benefits in terms of deployment, cyber, upgrade, scalability, IT footprint and business model

Thales, a strong expertise in protection of site

PORT

Against land, sea, and air threats

DEFENCE sites

+170 military sites from HQ to deployed camps

RELIGIOUS sites

Crowd monitoring with up to 2M pilgrims

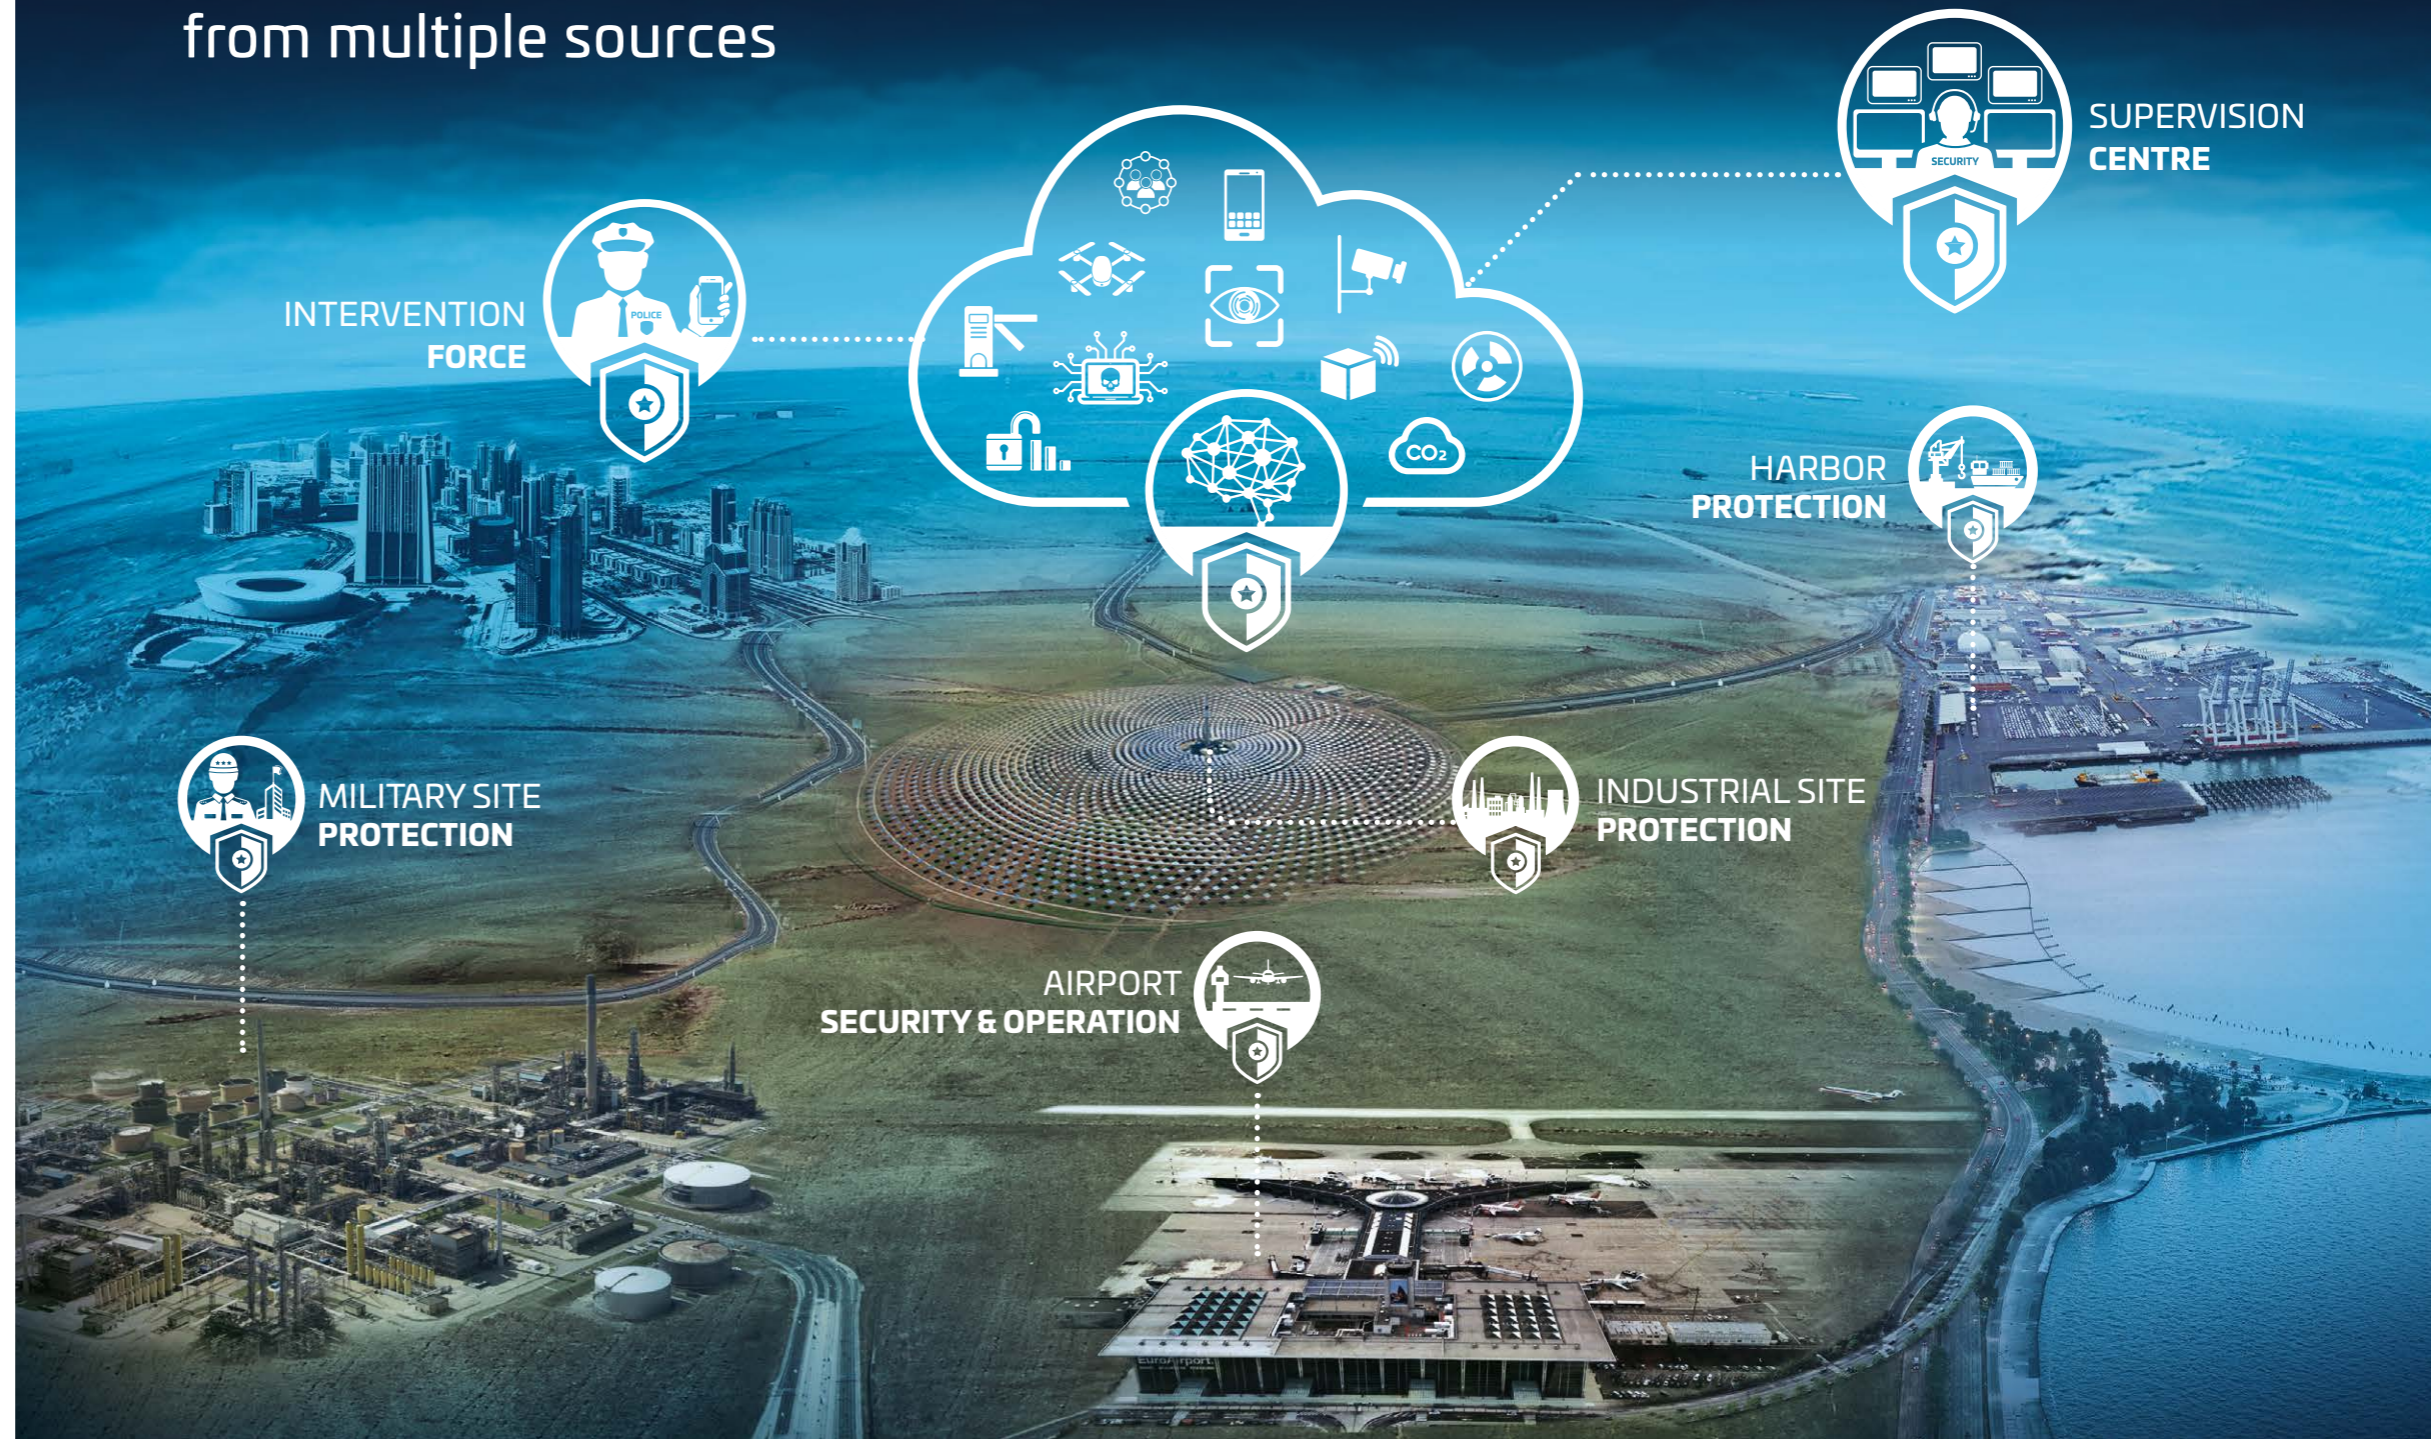

INDUSTRIAL sites

Multi-systems integration & monitoring

Thales Security Digital Platform

Smart processing of massive data from multiple sources

DETECT

ANTICIPATION

- Automation with analytics
- Counter UAV
- Social network analyses
- Employee community

UNDERSTAND

ACCURATE AWARENESS

- 3D maps' modelization
- Multi site federation
- Real-time security KPIs
- Biometric access control

DECIDE

QUALIFIED INCIDENT

- Correlate & fuse alarms
- Fast incident qualification
- Smart Incident management
- Impact assessment

RESPOND

COLLABORATION

- Resource assignation
- Patrol Apps
- Shared multi-media info
- Assisted tracking

REPORT

FAST ANALYSIS

- Fast event search
- Aided investigation
- Flexible dashboard
- Easy data export
