Almost 16 billion of them will be IoT devices

There are forecast to be 28 billion connected devices worldwide by 2021

IoT devices will overtake mobile phones as the largest category of connected devices in 2018

The number of IoT devices in Western Europe is projected to quadruple between 2015 and 2021

This will be driven by the spread of smart meters and connected cars, as well as consumer devices

There are forecast to be 28 billion connected devices worldwide by 2021.

IoT devices will overtake mobile phones as the largest category of connected devices in 2018.

The number of IoT devices in Western Europe is projected to quadruple between 2015 and 2021.

This will be driven by the spread of smart meters and connected cars, as well as consumer devices.
