F90MBR (Modular Bullpup Rifle)
The new generation military assault weapon

Designed to perform in the world’s toughest environments, the compact, lightweight F90MBR delivers accuracy and reliability with operational flexibility.
F90MBR
The new generation military assault weapon

Backed by over 100 years’ experience in manufacturing weapons for Australian soldiers from WW1 to the battlefields of today, the F90MBR (Modular Bullpup Rifle) is the new generation of superior assault rifle for integrated forces. The F90MBR builds on the battle proven F90 platform, delivering the flexibility and interoperability needed by the modern war fighter. The bullpup design with longer barrel length and optimum muzzle velocity provides superior stopping power in a compact, lightweight weapon.

Lightweight and interoperable for the integrated soldier

The F90MBR is one of the lightest assault rifles on the market at 3.15 kg, and is fitted with ambidextrous controls to enable fast reaction times and rapid target engagement - a clear advantage in close quarters combat.

NATO standard rails and magazine ensure compatibility and interoperability with existing weapon fleets and allied forces.

Operational flexibility

Available in three interchangeable barrel lengths: 508 mm (20in), 407 mm (16in) and 360 mm (14in), the F90MBR delivers the flexibility required on operations to support the needs of the modern, integrated soldier.

The F90MBR can be packaged with rifle accessory and ancillary equipment in an integrated, mission configurable Grab Case, delivering a modular small arms solution for any tactical scenario. A 40mm grenade launcher and sight can be fitted by the soldier in seconds - a potentially decisive capability.

Dependable

The F90MBR is well suited to use with amphibious forces enabling operators to swim with the weapon and fire immediately and reliably after emergence from the water.

Cold hammer forged chrome lined barrels ensure long life and precision when it’s needed. Extensive use of lightweight robust materials ensures that F90MBR can be relied upon at critical times.

Proven

The F90MBR is the new generation of F90 assault rifle, a proven in-service capability with the Australian Army. F90 has undergone a rigorous programme of testing and development with the Australian Department of Defence ensuring that the F90MBR is a superior weapon.

F90 CQB
- Weight: 3.15 kg
- Barrel Length: 360 mm
- Overall Length: 653 mm

F90
- Weight: 3.25 kg
- Barrel Length: 407 mm
- Overall Length: 701 mm

F90 (M)
- Weight: 3.39 kg
- Barrel Length: 508 mm
- Overall Length: 802 mm

F90 (G)
- Weight: 4.41 kg
- Barrel Length: 508 mm
- Overall Length: 802 mm
- Rifle Calibre: 5.56 mm x 45 NATO
- Grenade launcher can be fitted to all F90MBR variants
- Grenade Launcher Calibre: 40 mm x 46 LV
