Nexium Defence Cloud Edge

Mission effectiveness from HQ to the tactical edge

Nexium Defence Cloud Edge is a proven, secure mission-ready solution that enables joint force and coalition operations to operate effectively, in a disconnected environment at the tactical edge.

1. Rapidly deploy secure network access to in-theatre applications and data for land, sea, air, cyber and space missions.

2. Securely exchange critical information across military services, multinational coalitions and agencies to enable a shared common operating picture.

3. Equip forces at the tactical edge with powerful, modern IT and keep your data protected utilising zero trust security on any device.

4. Use AI-powered analytics from real-time data, processed at the tactical edge, to speed up and decentralise decision-making.
